Each site has a braai drum (grids available at reception), an electrical plug point(220V, peak times), a light and water tap (with drinking water). Our electricity is run predominantly on solar energy and we ask campers to cook on gas and fire as high energy devices electric stoves, kettles etc. trip the power. There are large, serviced ablutions with hot and cold water.

The communal area has a boma, a swimming pool, braai facilities, lounge and dining room. Our Self-catering units without their own kitchens make use of the guest kitchen area.
